SUBJECT INDEX

Canadian Journal of Soil Science, Volume 73, 1993

Acadia soils
  dykeland survey, 527
Acidification
  effect of fertigation on soil acidification, 157
Acidulation materials
  oxidation of S and acidulation of calcareous soils, 103
Agar
  measuring pH changes in fertilizer microsites, 129
Aggregation
  management-induced changes in water-stable aggregation, 51
Agrochemicals
  effects of agrochemicals on methane oxidation, 287
Air-filled porosity
  denitrification rate and determinant soil properties, 567
Alfalfa
  cobalt content of crops, 1
  soil properties and winter survival, 141
Aluminum
  extractable iron and aluminum in soils, 73
Amelioration
  soil structure and crop yield following subsoiling, 81
Ammonia volatilization
  lignosulfonate-fertilizer effects on N dynamics, 233
Animal manure
  availability of nitrogen in manure for corn, 253
Animal wastes
  economics of manure application, 267
Aspen Parkland
  forest invasion of prairie soils, 613
Available P
  overwinter changes in Olsen P, 123
Available water storage capacity
  soil properties and winter survival, 141

Barley
  cobalt content of crops, 1
  ground covers in raspberry production, 481
  N cycling under conventional and zero tillage, 183
Bedrock
  clay mineralogy of parent materials in southern Saskatchewan, 447
Bicarbonate-extractable P
  overwinter changes in Olsen P, 123
  response of soil and grain to regular P applications, 173
Bicarbonate-soluble Pi
  deep distribution of Olsen-P in soil, 555
Biogenic opal
  forest invasion of prairie soils, 613
Boundary line
  an empirical model of denitrification, 421
Bulk density
  tillage and rotations on soil physical properties, 223

Calcium dissolution
  ammonium lignosulphonate and phosphate reactions, 275
Carbohydrate
  management-induced changes in organic matter, 39
Carbon
  nitrogen mineralization, 27
Carbon-13 NMR
  humus types from two ecosystem phases, 9
Carbon dioxide evolution
  the influence of hexazinone on carbon dioxide evolution, 433
Cation leaching
  effect of fertigation on soil acidification, 157
Cesium-137
  ^{137}Cs use to investigate net soil erosion, 515
  estimating soil loss from changes in soil cesium-137, 629
  short-range variability of fallout ^{137}Cs, 381
Chemistry
  salinization at two sites in Alberta, 209
Chernozemic smectite
  x-ray diffraction characteristics of soil smectites, 93
Clay
  particle size separates, 137
Clay mineralogy
  clay mineralogy of parent materials in southern Saskatchewan, 447
Climate
  soil color-nitrogen relationship, 61
Closed basin
  salinization at two sites in Alberta, 209

Page numbers in **boldface** refer to abstracts.

Clover (white)
ground covers in raspbery production, 481
Cobalt
cobalt content of crops, 1
Cold hardiness
soil properties and winter survival, 141
Cold-wet dichromate digestion
organic-C dynamics in a Dark Brown Chernozem, 133
Conservation
^{137}Cs use to investigate net soil erosion, 515
replacing summerfallow with annual legume green manure, 243
Contaminant
particle size separates, 137
Conventional tillage
effects of management on soil P fractionation, 359
Corn
effectiveness of organo-mineral fertilizers, 197
urea and KCl placement for corn, 147
Corn yield
availability of nitrogen in manure for corn, 253
Crop growth
soil structure and crop yield following subsoiling, 81
Crop rotation
fertilization and nitrate leaching, 387
overwinter changes in Olsen P, 123
response of soil and grain to regular P applications, 173
soil aggregate stability in Brown soils, 597
tillage and rotations on soil physical properties, 223
Crystallinity
X-ray diffraction characteristics of soil smectites, 93
CuO oxidation
humus types from two ecosystem phases, 9

Decomposition
humus types from two ecosystem phases, 9
Degradation
fate of ^{14}C-metolachlor and atrazine in field lysimeters, 309
Denitrification
denitrification rate and determinant soil properties, 567
nitrous and nitric oxide emissions from manured soil, 539
Denitrification rate
an empirical model of denitrification, 421
Denitrifying enzyme activity
denitrification rate and determinant soil properties, 567
Deposition
^{137}Cs use to investigate net soil erosion, 515
Diammonium phosphate
lignosulfonate-fertilizer effects on N dynamics, 233
Dinitrogen fixation
replacing summerfallow with annual legume green manure, 243
Dithionite
extractable iron and aluminum in soils, 73
Diurnal pattern
plant species effects on soil temperature, 411
Dry combustion
organic-C dynamics in a Dark Brown Chernozem, 133
Dry sieving
soil aggregation in Black Chernozemic soils, 579
soil aggregate stability in Brown soils, 597
Dykeland
dykeland survey, 527

Electrical conductivity
oxidation of S and acidulation of calcareous soils, 103
Eroded soil
economics of manure application, 267
Erodibility
soil aggregate stability in Brown soils, 597
Erosion
^{137}Cs use to investigate net soil erosion, 515
Erosion plots
tillage effects on runoff and soil loss, 469
Erosion rate
estimating soil loss from changes in soil cesium-137, 629
Evaporite
mineralogy and trace elements of salt-affected soils, 399
Extractable soil potassium
soil properties and winter survival, 141

Feedlot manure
economics of manure application, 267
Fertigation
effect of fertigation on soil acidification, 157
Fertilization
soil aggregation in Black Chernozemic soils, 579

Fertilizer
availability of nitrogen in manure for corn, 253
deep distribution of Olsen-P in soil, 555
measuring pH changes in fertilizer microsites, 129
Fertilizer economics
economics of manure application, 267
Fertilizer efficiency
lignosulfonate-fertilizer effects on N dynamics, 233
Fertilizer N
fertilization and nitrate leaching, 387
Fertilizer N recovery
fertilizer N timing for irrigated spring wheat, 503
Fertilizer N timing
fertilizer N timing for irrigated spring wheat, 503
Fertilizer placement
urea and KCl placement for corn, 147
Forest invasion
forest invasion of prairie soils, 613
Forest soil
soil mass and nutrients under spruce fir forest, 317
the influence of hexazinone on carbon dioxide evolution, 433
Forest soil color
soil color-nitrogen relationship, 61
Fourier analysis
plant species effects on soil temperature, 411

Geometric mean diameter
soil aggregate stability in Brown soils, 597
soil aggregation in Black Chernozemic soils, 579
Geomorphology
forest soil properties and landscape morphology, 165
Gompertz equation
nitrogen mineralization, 27
Grain
urea and KCl placement for corn, 147
Green manure
deep distribution of Olsen-P in soil, 555
Grinding
extractable iron and aluminum in soils, 73

Herbicide
fate of ^{14}C-metolachlor and atrazine in field lysimeters, 309
Hexazinone
the influence of hexazinone on carbon dioxide evolution, 433
HI-reducible S
activity of arylsulfatase in Saskatchewan soils, 341
Hordeum vulgare (L.) (See Barley)
Horizon development
forest soil properties and landscape morphology, 165
Humic acids
wood residue application and soil organic matter, 115
Humic substances
iron humates and FE extractants in the rhyzospere, 293
Humins
wood residue application and soil organic matter, 115
Humus
humus types from two ecosystem phases, 9
Hydrology
salinization at two sites in Alberta, 209

Illuviation
forest soil properties and landscape morphology, 165
Inhibition
effects of agrochemicals on methane oxidation, 287
Iron
extractable iron and aluminum in soils, 73
iron humates and FE extractants in the rhyzospere, 293
Irrigation
fertilizer N timing for irrigated spring wheat, 503

Leaching
fate of ^{14}C-metolachlor and atrazine in field lysimeters, 309
Legume
deep distribution of Olsen-P in soil, 555
soil aggregation in Black Chernozemic soils, 579
Legume plow-down
replacing summerfallow with annual legume green manure, 243
Light and heavy fractions
wood residue application and soil organic matter, 115
Lignosulfonate
lignosulfonate-fertilizer effects on N dynamics, 233

Line potential
ammonium lignosulphonate and phosphate reactions, 275
Liquid hog manure
manure incubation with monocalcium phosphate, 371
Low-temperature injury
soil properties and winter survival, 141
Luvisol
forest soil properties and landscape morphology, 165

Maize
phosphorous placement for maize, 349
Management
management-induced changes in organic matter, 39
management-induced changes in water-stable aggregation, 51
Manure
availability of nitrogen in manure for corn, 253
economics of manure application, 267
effects of management on soil P fractionation, 359
manure incubation with monocalcium phosphate, 371
nitrous and nitric oxide emissions from manured soil, 539
replacing summerfallow with annual legume green manure, 243
Manure-fertilizer mixtures
manure incubation with monocalcium phosphate, 371
Medicago sativa L. (See Alfalfa)
Meteorological conditions
soil aggregate stability in Brown soils, 597
Methane oxidation
effects of agrochemicals on methane oxidation, 287
Microbial biomass
activity of arylsulfatase in Saskatchewan soils, 341
management-induced changes in organic matter, 39
Microclimate
plant species effects on soil temperature, 411
Microsite
measuring pH changes in fertilizer microsites, 129
Mineralogy
mineralogy and trace elements of salt-affected soils, 399
salinization at two sites in Alberta, 209
Mobility
fate of ^{14}C-metolachlor and atrazine in field lysimeters, 309
Model
an empirical model of denitrification, 421
Monocalcium phosphate
manure incubation with monocalcium phosphate, 371

Nitrate leaching
effectiveness of organo-mineral fertilizers, 197
fertilization and nitrate leaching, 387
Nitrate-N
replacing summerfallow with annual legume green manure, 243
Nitrate test
availability of nitrogen in manure for corn, 253
Nitric oxide
nitrous and nitric oxide emissions from manured soil, 539
Nitrification
lignosulfonate-fertilizer effects on N dynamics, 233
nitrous and nitric oxide emissions from manured soil, 539
Nitrogen
soil color-nitrogen relationship, 61
the influence of hexazinone on carbon dioxide evolution, 433
Nitrogen availability
availability of nitrogen in manure for corn, 253
Nitrogen fertilizer
effect of fertigation on soil acidification, 157
Nitrogen-15
N cycling under conventional and zero tillage, 183
Nitrogen recovery
N cycling under conventional and zero tillage, 183
Nitrogen uptake
fertilization and nitrate leaching, 387
Nitrogenation
fertilizer N timing for irrigated spring wheat, 503
Nitrous oxide
nitrous and nitric oxide emissions from manured soil, 539
No-till
effects of management on soil P fractionation, 359

Oat
cobalt content of crops, 1
Olsen P
response of soil and grain to regular P applications, 173
Organic acids
iron humates and FE extractants in the rhyzospere, 293
Organic carbon
activity of arylsulfatase in Saskatchewan soils, 341
organic-C dynamics in a Dark Brown Chernozem, 133
wood residue application and soil organic matter, 115
Organic matter
dykeland survey, 527
management-induced changes in organic matter, 39
N cycling under conventional and zero tillage, 183
nitrogen mineralization, 27
Organo-mineral fertilizers
effectiveness of organo-mineral fertilizers, 197
Oxalate
extractable iron and aluminum in soils, 73
Oxygen isotopes
sulfur and oxygen isotopes of sulfates, 633
Parent materials
clay mineralogy of parent materials in southern Saskatchewan, 447
Particle size
X-ray diffraction characteristics of soil smectites, 93
Particle thickness
X-ray diffraction characteristics of soil smectites, 93
Peat substrates
water desorption characteristics of peat substrates, 329
Peak intensity
X-ray diffraction characteristics of soil smectites, 93
Penetration resistance
tillage and rotations on soil physical properties, 223
Perennial ryegrass
ground covers in raspberry production, 481
pH
measuring pH changes in fertilizer microsites, 129
Phenolic compounds
sandy soil changes caused by vegetation, 459
Phosphatase
management-induced changes in organic matter, 39
Phosphate potential
ammonium lignosulphonate and phosphate reactions, 275
Phosphate precipitation
ammonium lignosulphonate and phosphate reactions, 275
Phosphorus
overwinter changes in Olsen P, 123
the influence of hexazinone on carbon dioxide evolution, 433
Phosphorus absorption
phosphorous placement for maize, 349
Phosphorus fractionation
effects of management on soil P fractionation, 359
manure incubation with monocalcium phosphate, 371
Phosphorus placement
phosphorous placement for maize, 349
Phosphorus uptake
manure incubation with monocalcium phosphate, 371
Plant chlorosis
iron humates and FE extractants in the rhyzospere, 293
Podzolic smectite
X-ray diffraction characteristics of soil smectites, 93
Porosité de retrait
espace poral et travail du sol, 299
Porosité structurale
espace poral et travail du sol, 299
Porosité texturale
espace poral et travail du sol, 299
Porosité totale
espace poral et travail du sol, 299
Potassium chloride
urea and KCl placement for corn, 147
Potentially mineralizable N
nitrogen mineralization, 27
Prairie-forest transition
forest invasion of prairie soils, 613
Precipitation
response of soil and grain to regular P applications, 173
Prediction
estimating soil loss from changes in soil cesium-137, 629
Pyrophoshate
extractable iron and aluminum in soils, 73

Quantitative pits
soil mass and nutrients under spruce fir forest, 317

Radioisotope
fate of ^{14}C-metolachlor and atrazine in field lysimeters, 309
Reduced-tillage
effects of management on soil P fractionation, 359
Regression analysis
soil color-nitrogen relationship, 61
Resistance to penetration
dykeland survey, 527
Root growth
phosphorous placement for maize, 349
Rotation
deep distribution of Olsen-P in soil, 555
Runoff
snowmelt runoff, 489
tillage effects on runoff and soil loss, 469

Salal
humus types from two ecosystem phases, 9
Salinity
mineralogy and trace elements of salt-affected soils, 399
Salinization
salinization at two sites in Alberta, 209
sulfur and oxygen isotopes of sulfates, 633
Salt
dykeland survey, 527
Sample size
soil mass and nutrients under spruce fir forest, 317
Sand
particle size separates, 137
Season
tillage effects on runoff and soil loss, 469
Sedimentation
particle size separates, 137
Sheep's fescue
ground covers in raspberry production, 481
Short-range variability
short-range variability of fallout ^{137}Cs, 381
Side-hill seep
salinization at two sites in Alberta, 209
Siderophores
iron humates and FE extractants in the rhyzospere, 293
Silt
particle size separates, 137
Size fractionation
particle size separates, 137

Slaking
management-induced changes in water-stable aggregation, 51
Snow management
fertilization and nitrate leaching, 387
Snowmelt
snowmelt runoff, 489
Sodium
dykeland survey, 527
Soft white wheat
fertilizer N timing for irrigated spring wheat, 503
Soil acidification
effect of fertigation on soil acidification, 157
Soil conservation
^{137}Cs use to investigate net soil erosion, 515
replacing summerfallow with annual legume green manure, 243
Soil depth
forest soil properties and landscape morphology, 165
Soil loss
tillage effects on runoff and soil loss, 469
Soil management
management-induced changes in organic matter, 39
management-induced changes in water-stable aggregation, 51
Soil methane oxidation
effects of agrochemicals on methane oxidation, 287
Soil moisture
replacing summerfallow with annual legume green manure, 243
soil color-nitrogen relationship, 61
Soil moisture budget
snowmelt runoff, 489
Soil nitrate test
availability of nitrogen in manure for corn, 253
Soil nitrogen
soil color-nitrogen relationship, 61
Soil organic matter
nitrogen mineralization, 27
Soil pH
forest soil properties and landscape morphology, 165
oxidation of S and acidulation of calcareous soils, 103
Soil quality
management-induced changes in organic matter, 39
nitrogen mineralization, 27
Soil temperature
plant species effects on soil temperature, 411

Soil testing
overwinter changes in Olsen P, 123
Soil texture
nitrogen mineralization, 27
soil color-nitrogen relationship, 61
Soil water
soil structure and crop yield following subsoiling, 81
Soil-landscape relationship
forest invasion of prairie soils, 613
Spodosols
sandy soil changes caused by vegetation, 459
Spruce-fir
soil mass and nutrients under spruce fir forest, 317
Subsoiling
soil structure and crop yield following subsoiling, 81
Sulfates
sulfur and oxygen isotopes of sulfates, 633
Sulfur
activity of arylsulfatase in Saskatchewan soils, 341
the influence of hexazinone on carbon dioxide evolution, 433
Sulur incubation
oxidation of S and acidulation of calcareous soils, 103
Sulfur isotopes
sulfur and oxygen isotopes of sulfates, 633
Sulfur oxidation
oxidation of S and acidulation of calcareous soils, 103

Tannin
humus types from two ecosystem phases, 9
Temperature effects
plant species effects on soil temperature, 411
response of soil and grain to regular P applications, 173
Tertiary
clay mineralogy of parent materials in southern Saskatchewan, 447
Testing
overwinter changes in Olsen P, 123
Texture
nitrogen mineralization, 27
soil color-nitrogen relationship, 61
Tillage
effects of management on soil P fractionation, 359
N cycling under conventional and zero tillage, 183
tillage and rotations on soil physical properties, 223
tillage effects on runoff and soil loss, 469
Time domain reflectometry
water desorption characteristics of peat substrates, 329
Timothy
cobalt content of crops, 1
Trace elements
mineralogy and trace elements of salt-affected soils, 399
Travail du sol
espace poral et travail du sol, 299
Triple superphosphate
measuring pH changes in fertilizer microsites, 129
Typic cryoboroll
N cycling under conventional and zero tillage, 183

Uppermost Cretaceous
clay mineralogy of parent materials in southern Saskatchewan, 447
Urea
measuring pH changes in fertilizer microsites, 129
lignosulfonate-fertilizer effects on N dynamics, 233
urea and KCl placement for corn, 147

Vegetation effects
plant species effects on soil temperature, 411
Vegetation-induced soil changes
sandy soil changes caused by vegetation, 459

Water characteristics
water desorption characteristics of peat substrates, 329
Water erosion
short-range variability of fallout ^{137}Cs, 381
Water release curve
water desorption characteristics of peat substrates, 329
Water-stable aggregates
wood residue application and soil organic matter, 115
Wet aggregate stability
ground covers in raspberry production, 481
Wet sieving
soil aggregation in Black Chernozemic soils, 579
soil aggregate stability in Brown soils, 597
Wheat
cobalt content of crops, 1
fertilizer N timing for irrigated spring wheat, 503

Wheat (soft white)
fertilizer N timing for irrigated spring wheat, 503
White clover
ground covers in raspberry production, 481
Wind erosion
soil aggregation in Black Chernozemic soils, 579
Wood residues
wood residue application and soil organic matter, 115
Zea mays L. (See Corn)
Zero tillage
effects of management on soil P fractionation, 359
N cycling under conventional and zero tillage, 183
